VOIPLI 320 IP Phone

Package contents:

1. 1 Voipli 320 IP Phone.
2. 1 Ethernet Cable.
3. 1 Universal switching power supply 100- 240 VAC 650 m Amp. with a USA standard adaptor.

Warranty:

1. This product is warranted for life time as long as “*Line Holder Monthly Subscriber Plan*” is active.
2. In a case a hardware malfunction is suspected, please contact Voipli’s customer support for further instructions.

Note:

1. The unit was fully tested while your Tel. number was programmed in it. If you are not able to make calls or you can’t reach dial tone it means 99 % of probability that you have a network problem and you should call your local network provider for assistance.
2. From our experience, a proper configuration of your router will solve the problem.
3. Being a Voipli subscriber allows you always to use the softphone as a back up or as a mobile phone at no extra charge and remain available to make and receive calls anywhere!!

. 320 IP Phone Connection and dialing Instructions

1. Connection:

- A. Be sure that you have a router with internet connection, it means that you are able to connect two or more computers or devices at the same time.
- B. Connect the IP Phone according to the connections settings diagram, as shown in the next page.
- C. Wait until the “Ready for Calls” message appears in the screen, check for dial tone, if available then you are ready for the next step.

Notes:

If you can't reach step C above, check that your router is at DHCP mode, it means that automatically assigns IP addresses, (default configuration).

If you still can't reach step C contact your ISP for further assistance.

2. How to dial from a Voipli device.

- A. To Israel dial just city or cell prefix 02, 03 etc.or 054, 052, etc. You will pay Israeli local day rates.
- B. To a Voipli line anywhere just dial its 7 digits number without any prefix. You will pay **NOTHING**
- C. For the rest of the world dial 00- Country code- city code- number.
- D. For assistance dial 199.
- E. For advanced network features login “member center” in our website by typing your User ID and password then choose your options.
- F. **Mailbox configuration:** Dial your own number from your device without any prefix (7digits), you'll be answered by the Voipli Mailbox system. Follow the instructions...
- G. It is recommended to press # following any phone number. This will speed up your connection!!

Note: Voipli provides an Israeli telephone line, no emergency local calls are available.
